

Bachelor of Science in Biology

The B.S. in Biology: A Degree to Launch Your Scientific Career

Designed in response to local industry demand, this bachelor's degree in Biology sets you on the path toward a rewarding scientific career or advanced study in a master's-level STEM or M.D. program.

Skills-Based Preparation for Aspiring Scientists

This well-rounded biology degree program provides the broad foundational knowledge as well as laboratory and data science skills necessary for careers in:

- Aquaculture
- Animal Science
- Bioengineering
- Bioinformatics
- Biopharmaceuticals
- Biotechnology
- Environmental Restoration
- Forensics
- Genetics
- Human Biology
- Laboratory Science
- Medicine
- Microbiology
- Molecular Biology
- Scientific Research
- Zoology/Wildlife Biology

Hands-On Learning in State-of-the-Art Labs and Facilities

The core science courses in WilmU's B.S. in Biology degree program are offered at our Brandywine and New Castle locations. Learn, explore and discover in Brandywine's new laboratories, which feature laminar flow hoods, biosafety cabinets, cryogenic freezers and carbon dioxide incubators.

Co-Op Learning Experiences in Biology With NASA, INBRE and More

Build your resume and professional network through the B.S. in Biology's required cooperative learning experience. WilmU's affiliation with the NIH-funded INBRE program, the NASA-funded DE Space Grant Consortium and dozens of labs throughout the state provide exciting STEM-based research and internship opportunities.

✓ = Typical Completion Degree Course

* Students with fewer than 16 transfer credits are required to take FYE 101 as one of their electives. Due to the mixture of three- and four-credit courses available, students must be diligent and seek advice as they work through the program. One free elective course must be four-credits, or a sixth three credit course will be required to earn 16 total credits.
